Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6-9, 13-16, 20, 21, and 23-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Freedman.

Freedman shows an apparatus for dispersing a fire suppression agent, the apparatus comprising: a housing 16 defining a cavity, the cavity having an opening; a cover 26 sealing the opening; a fire suppression agent disposed with the cavity; a flexible sheet 52 disposed with the cavity, the sheet configured to disperse the fire suppression material upon opening of the cover with the opening downwardly oriented; a latch 36 having a first position for maintaining the cover in a position to close the opening and a second position for opening the cover to disperse the fire suppression agent; a thermally activated trigger 40 as recited in claim 13. Regarding claim 15, any stove has a switch for signaling a device to remove an energy source from the stove. The device carries out the method of claim 16 since it comprises the structural limitations and functionality of the instant claim.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 5, 10-12, 17-19, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Freedman.

Freedman does not appear to disclose the flexible being folded over multiple times within the cavity, however, such an arrangement would have been a matter of design choice since folding the flexible sheet instead of rolling it would still carry out the same function of dispersing the fire suppression agent when the sheet unravels downwardly. Regarding claim 10, having the agent to be alternatively distributed in different directions would have been a matter of design choice depending on the placement of the agent along the flexible sheet and providing depressions as recited in claim 12 would also have been a matter of design choice since the sheet will still hold agent with or without such depressions.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis Hwu whose telephone number is (571)272-4904.
